

Is your company ready for the upcoming app explosion?

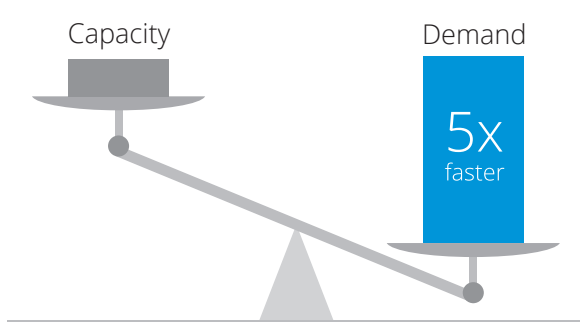

## The Enterprise App Explosion

Gartner predicts that the average number of apps per enterprise will grow from 11 in 2015 to 1400 in 2024.

## Capacity will not keep pace.

The demand for mobile apps will grow at least five times faster than internal IT organization capacity to deliver them. \*

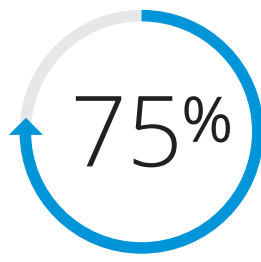

## Will your IT organization become a bottleneck?

- 18-24 month enterprise development cycles
- Unable to hire mobile developers fast enough
- Legacy systems are not mobile friendly

## Gartner Recommends

Adopting a bimodal IT approach and empowering citizen developers within the enterprise to accelerate mobile innovation.

According to Gartner, by 2017, 75% of IT organizations will have gone bimodal in some way.

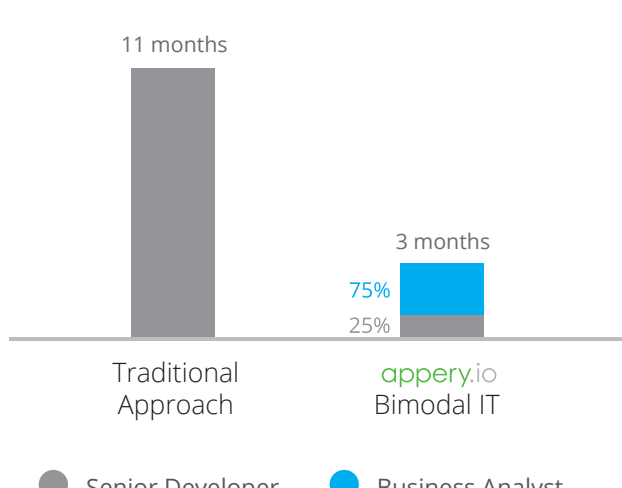

By 2018, more than half of all mobile apps will be created by business analysts using codeless tools.

## Case Study

*"We switched from a traditional platform to Appery.io to accelerate time to market and to develop apps that are more cost effective." - Susco Corporation*

Time required to build the same app using a traditional platform vs. bimodal IT

Want to learn how to implement a bimodal IT strategy for 2016?
